

SUMP PUMP CONTROL PANEL

OVERVIEW

Power Assemblies has designed a family of low-cost, high-quality, UL580A Listed control panels for use with sump pumps. With two sizes and multiple options these panels are ready to control pumps with limit switches for the purpose of displacing water. These panels provide a quality solution for water control measures from small to medium load applications. All units are UL Listed and designed for both commercial and industrial use.

Features and Benefits

Flexible design allows for single or dual pump configurations

ANSI-61 gray powder coated 0.075 carbon steel for long life and corrosion resistance

Easy installation and set up

UL508A Listed

Available in 3 Phase 480V or 208V or 1 Phase 120V or 240V

NEMA 4/12 enclosure suitable for wind driven rain and remains undamaged by the external formation of ice on the system
